Erwan Froissard

Freelance - Senior Platform Engineer

Nantes, France erwanfroissard@gmail.com erwanfroissard

Experience

Filigran, Senior Platform Engineer
Remote
04/2026 – 09/2026
6 months

French scale-up publishing OpenCTI, OpenAEV and OpenCRQ (open-source solutions) and an agentic AI layer (XTM One); it offers a cyber threat management platform used internationally by large enterprises and public sector organizations. My contribution within the platform team (12 people) was organized around three priorities:

- Industrialized the deployment of the new OpenCRQ solution (instance management tool)
- Unified Helm packaging for the XTM One, OpenCTI, OpenAEV and OpenCRQ solutions
- Delivered an air-gapped appliance

AVIV Group, Senior Site Reliability Engineer
Paris (remote)
09/2022 – 04/2026
3 years 8 months

Following the acquisition by Axel Springer, MeilleursAgents became part of AVIV Group, which brings together SeLoger, MeilleursAgents, Immoweb (BE) and Immowelt (DE), with the goal of becoming Europe's leading real estate platform.

- Supported the Data teams in migrating from GCP to AWS (ECS, RDS, API Gateway, Airflow)
- Led the technical roadmap and aligned stakeholders (SRE, DE, EM, Head Of)
- Adopted new CI/CD tools, overhauled deployment processes and ensured compliance across the group
- Strengthened production culture, observability (Datadog, SLO), cost tracking and reduction (FinOps) and decommissioning
- Standardized and automated infrastructure (Terraform modules, Renovate)
- Took part in hiring DevOps/SRE profiles
- On-call rotations

MeilleursAgents (AVIV Group), Site Reliability Engineer
Paris (remote)
04/2021 – 09/2022
1 year 6 months

MeilleursAgents is a scale-up and leader in real estate valuation. When I joined, the challenge was to consolidate the technical stack and support the Web and Data teams (~200 people).

- Continuously improved platform stability and scalability on GCP
- Standardized Kubernetes deployments via ArgoCD (GitOps approach)
- Modernized observability and alerting (VictoriaMetrics, Grafana)
- Modernized the API Gateway stack (Kong Ingress Controller)
- Migrated PostgreSQL databases to Cloud SQL
- Supported the Web & Data teams on best practices (architecture, IaC, CI/CD, monitoring)
- Maintained the platform in operational condition (MCO)

RCA, Systems Engineer
Nantes
03/2019 – 12/2020
1 year 10 months

RCA is a software vendor for chartered accountants, offering a SaaS platform (mon-expert-en-gestion.fr). In a fast-growth context, when I joined it was important to industrialize the platform to make it more reliable, more secure, and scalable, while supporting the teams (~120 people) in using it.

- Containerized and deployed applications on Kubernetes via CI/CD
- Developed an on-demand environment creation tool
- Set up a catalog of Docker images (Golden Images)
- Supported development teams
- Automated infrastructure with Ansible and Molecule
- Improved observability and business dashboards
- On-call rotations

Neocom Multimédia, Systems and Network Administrator — Nantes
Neocom is a telecom operator providing VoIP and value-added Web services. The goal was to migrate to the Cloud and automate deployments. — 10/2017 – 02/2019 — 1 year 5 months

- Industrialized server and application deployments with Ansible
- Migrated and evolved the infrastructure from on-premise DC to OVH Public Cloud
- Managed physical (bare-metal) hypervisors in datacenters and distributed storage (Ceph)
- On-call rotations

L.D.C, Systems and Network Administrator — Sablé-sur-Sarthe — 01/2017 – 09/2017 — 9 months

- Level 2 support, Web infrastructure administration, MDM operations

Université d'Angers, Systems Administrator (work-study) — Angers — 09/2015 – 09/2016 — 1 year 1 month

- Set up a distributed monitoring solution (Centreon) and built custom probes

Skills

Cloud (AWS): VPC, ALB/NLB, API Gateway, CloudFront, ECS (Fargate), IAM, RDS, OpenSearch, S3, MWAA, SageMaker

Cloud (GCP): GKE, Compute Engine, Pub/Sub, Cloud Storage, IAM, Cloud SQL, BigQuery, VPC, Load Balancing, Redis

Containers & orchestration: Kubernetes (bare-metal), Rancher, Docker, Helm, Kustomize

CI/CD: GitLab CI, CircleCI, ArgoCD, Jenkins, Renovate

Infrastructure as Code: Terraform, Ansible

Monitoring & observability: Datadog, Prometheus, VictoriaMetrics, Grafana, AlertManager, Loki

Development: Python, Golang, Bash

Data: PostgreSQL, Jupyter Notebook, Airflow

Soft skills: Teamwork, knowledge sharing, DevOps culture, customer & user orientation, technology watch

Languages

French: Native

English: Fluent

Certifications

Certified Kubernetes Administrator (CKA) — 2019
Cloud Native Computing Foundation (CNCF)

Education

IUT Angers — 2015-2016
Professional Bachelor's Degree in Networks & Telecommunications (work-study)

Lycée Chevrollier - Angers — 2013-2015
BTS in IT Services for Organizations (Systems and Networks specialization)
